Lihon Gebre

AI & Backend Engineer | Workflow Automation

Addis Ababa, Ethiopia | lihongebre@gmail.com
www.lihongebre.com | github.com/gelftheshot | linkedin.com/in/lihongebre

Top Rated on Upwork | 10 completed jobs | 9 written client reviews | CS, Addis Ababa University

AI and backend engineer who builds RAG chatbots and AI agents, with engineering roles from 2016 to 2025 and Upwork client work from October 2024.

SELECTED EXPERIENCE

Independent AI & Backend Projects | Upwork | Selected engagements, 2024 - 2026

- Rated 5/5 on every contract completed between October 2024 and June 2026.
- Hired four times by the same client account, most recently to clone an earlier AI search engine.
- Built a RAG AI agent for another client in June and July 2025.

AI, Backend & Automation Engineer | NDIT Solution | 2023 - 2025

- Integrated model-driven features with backend services and application data.
- Built server-side logic, service interfaces and data flows.
- Automated multi-step workflows with validation and human review.

Backend Developer (Internship) | ALX Africa | Mar 2023 - Nov 2024

- Developed backend features in Python and Django and collaborated on their REST APIs.
- Took part in data access and database optimization work.

Backend & Infrastructure Engineer | AxonTech | 2020 - 2023

- Wrote backend logic and service interfaces over persistent data stores.
- Configured runtime and deployment environments for application services.
- Diagnosed service problems and kept applications maintained.

SELECTED PROJECTS

Knowledge-base AI chatbot (RAG) | Oct 2024 - Apr 2025

Chatbot for a client's knowledge-based system, built with retrieval-augmented generation. The client's review praises clear and transparent updates.

Academic Advisor AI | Public source

Next.js planning assistant that pulls academic information from a Pinecone index so Google Generative AI can recommend courses and majors.

github.com/gelftheshot/academic-advisor-ai

AI development for SaaS | Jun 2025 - Jul 2025

LangChain and LangGraph development for a SaaS product. The client recommends Lihon as an independent full-stack developer.

EDUCATION & TRAINING

Bachelor of Science, Computer Science - Addis Ababa University | Accelerated Software Engineering Program - ALX

n8n101 Essentials (Sep 2026) | n8n102 Integrations (Oct 2026)

AWS Cloud Practitioner Essentials course (Sep 2024) | ALX Backend program (Jul 2024)
