Lihon Gebre

AI & Backend Engineer | Workflow Automation

Addis Ababa, Ethiopia | lihongebre@gmail.com
Portfolio: portfolio-one-rose-74.vercel.app | GitHub: gelftheshot | LinkedIn: lihongebre
Upwork: Lihon G.

PROFESSIONAL PROFILE

Lihon Gebre is an AI and backend engineer based in Addis Ababa, Ethiopia. His employment history spans 2016 to 2025, with public Upwork completed client work extending through June 2026.

TECHNICAL SKILLS

AI and retrieval: Retrieval-augmented generation (RAG), LangChain, Pinecone, Vector retrieval, Conversational AI, Multimodal AI workflows, Natural language processing, PyTorch

Backend and APIs: Python, Django, Node.js, Express.js, REST APIs, Socket.io, JWT authentication

Data and persistence: PostgreSQL, MongoDB, MySQL, Redis, Firebase

Web development: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS

Cloud and engineering tools: AWS, Docker, Kubernetes, CI/CD, Nginx, Linux, Git, GitHub

Computer science: C, Data structures, Algorithms

Automation: API integrations, Workflow orchestration, AI-assisted processes, Human review

EMPLOYMENT HISTORY

NDIT Solution | AI, Backend & Automation Engineer | 2023 - 2025

AI, backend, and workflow automation engineering.

Focus: AI integration, Backend engineering, Workflow automation, API integration

ALX Africa | Backend Developer | 2022 - 2023

Backend development with Python and Django, including collaboration on RESTful APIs and database optimization.

Focus: Python, Django, RESTful APIs, Database optimization

Axious Tech | Backend & Infrastructure Engineer | 2020 - 2023

Backend development and the infrastructure supporting application services.

Focus: Backend architecture, Infrastructure, Deployment environments, Data persistence

Anbesa Tech | Full Stack Developer | 2018 - 2020

Full-stack web development across application interfaces, backend logic, and data handling.

Focus: Full-stack development, Web interfaces, API integration, Application logic

Freelance | Backend Developer | 2017

Independent backend development for software applications.

Focus: Independent development, Backend services, Service interfaces, Data persistence

Yehulu Tech | Backend Developer | 2016 - 2017

Backend development focused on application logic and data.

Focus: Backend development, Server-side logic, Data models, Persistence

Lihon Gebre

AI & Backend Engineer | Workflow Automation

SELECTED CLIENT WORK - UPWORK | 2024-2026

10 public completed jobs; 9 written reviews. Top Rated; 100% Job Success (profile snapshot: Nov 2, 2026).

Source: Public Upwork profile and completed work

debug 502

Mar 2026 - Jun 2026 | Client account: CLICK CLICK | Client rating: 5/5

AI (LangChain, LangGraph) developer for SaaS

Jun 2025 - Jul 2025 | Client account: Wojciech Wierzchowski | Client rating: 5/5

AI Chatbot Developer for Knowledge-Based System Using RAG

Oct 2024 - Apr 2025 | Client account: Lancelot Studios | Client rating: 5/5

AI Agent Developer

Mar 2025 - Mar 2025 | Client account: Nsx Talent | Client rating: 5/5

FEATURED PORTFOLIO PROJECTS

SeaSure

Role: AI & Backend Engineer

Boat-specific AI troubleshooting, multimodal guidance, maintenance records, and contextual handoffs to marine service professionals.

Read engineering case study

Projuno

Role: AI & Backend Engineer

AI-powered construction operations connecting project workflows, financial visibility, change traceability, and compliance records.

Read engineering case study

Dr. Infinity

Role: AI & Backend Engineer

Clinical knowledge AI combining medical knowledge graphs, concurrent vector retrieval, evidence grounding, and privacy-aware ingestion.

Read engineering case study

TRAINING AND CREDENTIALS

n8n102 - Integrations: APIs and Connected Workflows | n8n | Oct 2026

n8n101 - Essentials: Your First Workflows | n8n | Sep 2026

EDUCATION

Bachelor of Science, Computer Science | Addis Ababa University

Accelerated Software Engineering Program | ALX

LANGUAGES

English: Fluent | Amharic: Native
